# Job

- Создает под для выполнения задачи
- Перезапускает поды до успешного выполнения задачи или истечения таймаутов
  - `activeDeadlineSeconds`
  - `backoffLimit`

# CronJob

- Создает Job по [расписанию](#)
- Важные параметры
  - `startingDeadlineSeconds`
  - `concurrencyPolicy`
  - `successfulJobsHistoryLimit`
  - `failedJobsHistoryLimit`

# CronJob

A cron job creates a job object *about* once per execution time of its schedule.

We say “about” because there are *certain circumstances* where two jobs might be created, or no job might be created.

We attempt to make these *rare*, *but* do not completely prevent them.

Therefore, jobs should be *idempotent*.

# CronJob

A cron job creates a job object *about* once per execution time of its schedule.

We say “about” because there are *certain circumstances* where two jobs might be created, or no job might be created.

We attempt to make these *rare*, *but* do not completely prevent them.

Therefore, jobs should be *idempotent*.
